DETAILED ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing of responses to Office Actions directly into the Group at (703)872-9306. This practice may be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 1, 2, 6-10, 12, 20-26, 32-36 have been amended for further examination.

Allowable Subject Matter

2. Claims 1-36 are allowed.

Art Unit: 3722

3. The following is a statement of reasons for the indication of allowable subject matter: No prior art of record discloses cover authoring tool and method comprising: an interface that receives size information for a document to be bound into a book, and receives content information for at least a front region and a spine region; and a cover content layout engine that composes a final content layout for the cover, wherein the cover engine layout scales the content received for the front cover region and formats the content received for the spinal region of the cover to accommodate the width and height dimensions of the book spine; and wherein the cover content layout engine selects typeface parameter values for the spinal text content; and including all of the other limitations of the independent claims.

Michaelis et al is the closest reference to read on applicant's invention. However, Michaelis et al does not disclose a cover content layout engine which formats the content received for the spinal region of the cover to accommodate the width and height dimensions of the book spine. Michaelis et al formats the content received to accommodate only the width (thickness) of the spine region, not the height dimensions.

Prior Art References

The prior art references listed in the attached PTO-892, but not used in a rejection of the claims, are cited for (their/its) structure. Perine et al and Ryan et al discloses similar authoring tools
